

Freight Company Analysis

Problem statement:

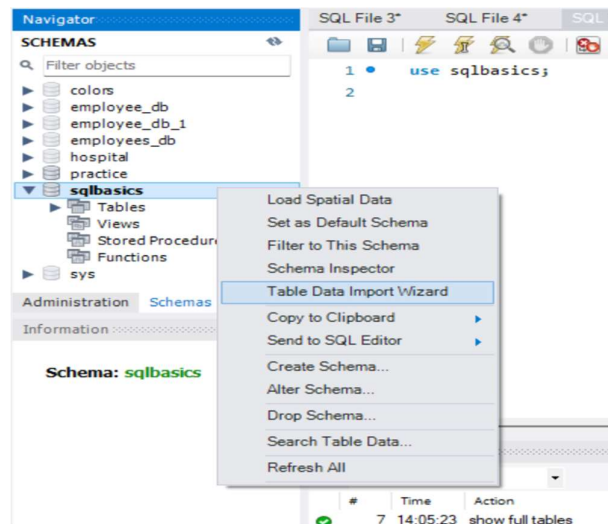

As an analyst of a port inspection team at a freight company, you've been asked to perform analyses using VIEWS.

Objective:

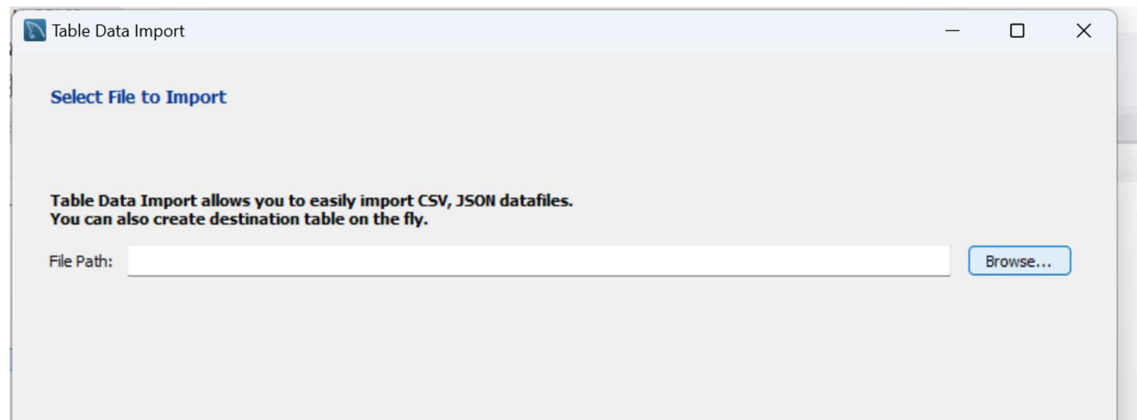

To analyze the transportation of orders of various quantities across different ports.

1. -- create a database named sqlbasics:
create database sqlbasics;
2. -- select database:
use sqlbasics;
3. -- Upload the FreightRates.csv dataset to the lab
-- Import freightRates.csv into the database as a table

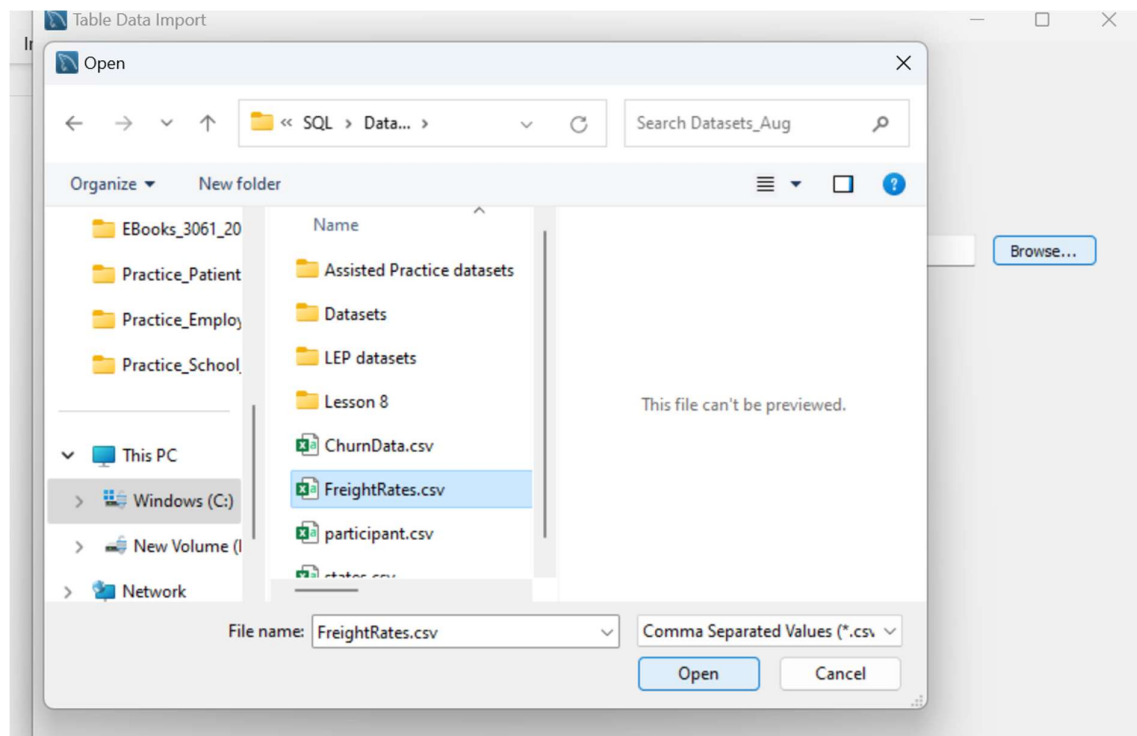

Right click on schema:sqlbasics -> select 'table data import wizard'

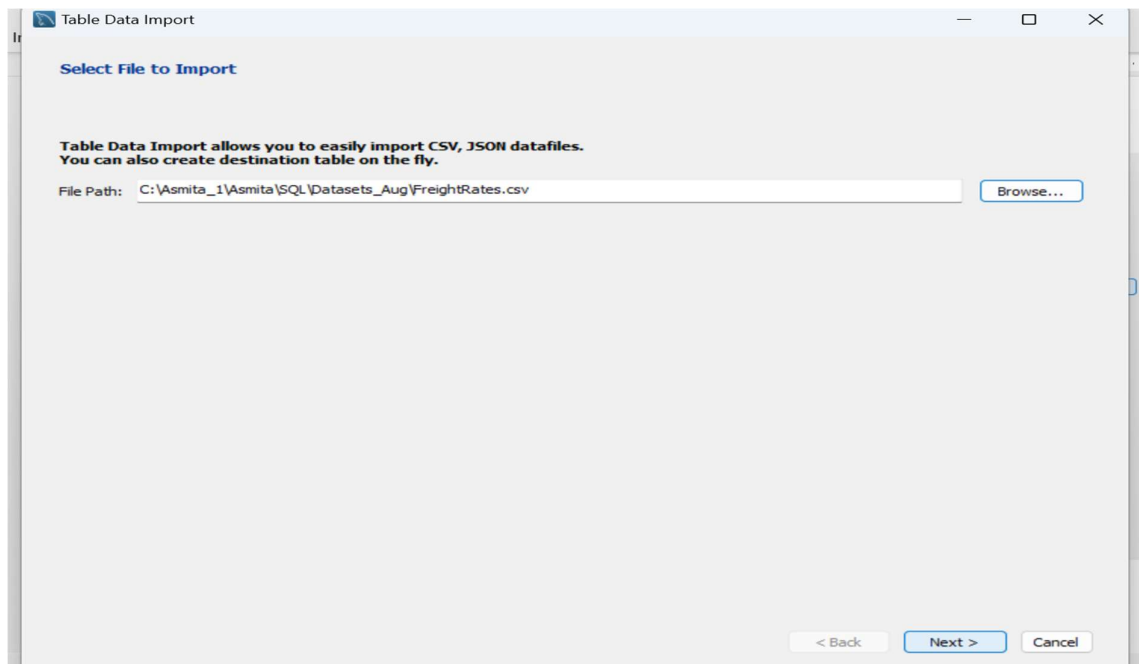

Browse or enter the path of the file to import

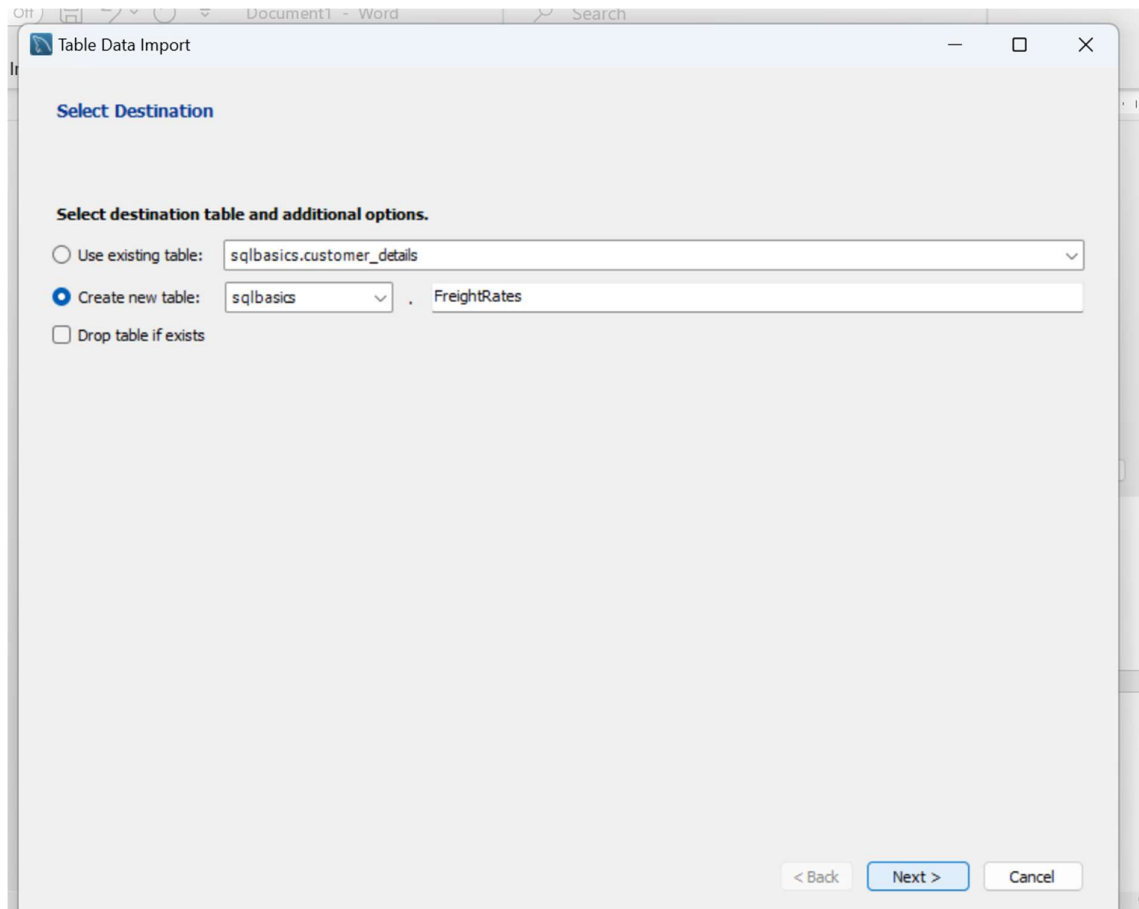

Select the file and then click 'Open'.

Click on the 'Next' button

Select the destination for the table -> click 'Next'

Configure some import settings -> click 'Next'.

Table Data Import

Configure Import Settings

Detected file format: csv 

Encoding:

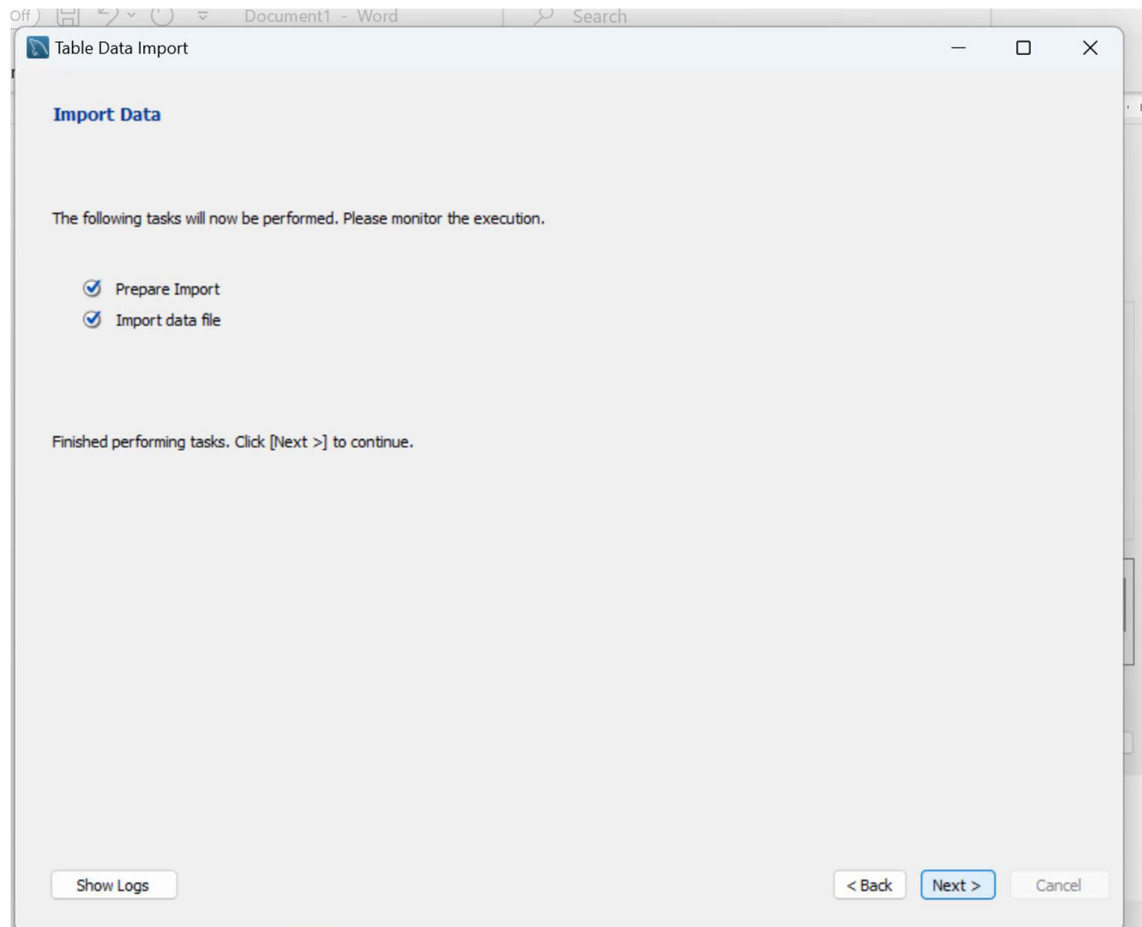

Columns:
